technology SUMMIT

June 26, 2012
Embassy Suites Indianapolis North
3912 Vincennes Road, Indianapolis 46268

New and innovative technology solutions offer great promise to improve quality of care while reducing health care costs. Technology has already transformed our lives and now it is time for technology to transform the experience of aging. The inaugural Tech Summit will showcase trends in the industry that illustrate how technology can improve health care, preserve independence, and ensure quality of life for seniors. The Summit schedule includes plenty of time to browse booths and share with peers. Plan to join us June 26th for this exciting idea exchange!

INALA
Indiana Assisted Living Association

HOPE
Hoosier Owners & Providers for the Elderly

8:30 – 9:00 AM: Registration

9:00 – 10:00 AM: The Transformation of Healthcare into a Patient-Centric, Digital Field

Accountable Care Organizations and Integrated Delivery Networks are two ways that health systems are reacting to healthcare reform as they live in a straddling environment where they try to operate in the funding available today while anticipating a changed method of reimbursement in the future. The implication of the impact of healthcare reform on the entire US healthcare system will be presented with a focus on how these changes impact the technological needs of the organization. It will be stressed that being "at the table" is preferable to being "on the menu." The technology that allows healthcare systems to process real-time information and realize the goals of the patient-centered medical home movement will be discussed.

Bill Felkey, Professor Emeritus of Healthcare Informatics: Auburn University

10:00 – 10:30 AM: Technology Showcase

10:30 – 11:30 AM: Getting Ready for the Next Wave of Portable Information Technology

Mobile Health (mhealth) is allowing aging services professionals to be as connected as they wish. The opportunities to employ portable information appliances throughout the continuum of care and administratively are many. Increased telecommunication options allow for a new set of the "five rights" to be considered. These are: the right person, doing the right intervention, in the right facility, for the right patient, at the right time. This session will explore the many capabilities offered by portable information technology in today's provision of healthcare.

Bill Felkey, Professor Emeritus of Healthcare Informatics: Auburn University

11:30 – 12:15 PM: Indiana Health Information Exchange

This session will present a review of the Indiana Health Information Exchange and its work with LTC and future plans.

John Kansky, Vice President, Business Development: Indiana Health Information Exchange

12:15 – 1:00 PM: Lunch @ Technology Showcase

1:00 – 3:15 PM: Panel Discussions on Technologies

Infrastructure technologies

Marquette will share the challenges of installing and

implementing EMR in a busy SNF including hardware, software, IT infrastructure, carpentry, training, equipment and supply issues. *Steven Still, Executive Director: Marquette*

Health and wellness technologies

Milner will explain how the Talyst machine has allowed for more time with the residents, shortened med pass times, decreased med waste amounts, and virtually eliminated narc counts. It allows for a quicker response to a resident's medication needs. *Ginny Cromer, Director of Nursing: Milner Community Health Care*

Safety technologies

New advancements in wireless technology helped Parkview Haven replace their 30 year old call system with an advanced wireless nurse call system. Josh will share how they now have location tracking, reporting modules, and how they can easily expand the system at any time.

Joshua Johnson, Chief Technology Officer: Parkview Haven

Documentation technologies

Holy Cross Village will discuss how they partnered with Pinnacle to create a SharePoint site that helped consolidate campus information into a one stop web page. They will talk about where they were prior to the project, how it came together, and how the finished product worked. *John Mauch, Jr., President and CEO: Holy Cross Village at Notre Dame; Joel Chmiel & Craig Sroda: Pinnacle of Indiana.*

Social networking technologies

Elderly adults are the fastest growing segment of Americans... they're also the fastest growing segment of social media users. Learn how to leverage technology to create and manage social tools, and how doing so can help stave off feelings of depression and isolation in your community. *Marc Oestreich: Golden Tech*

3:30 – 4:30 PM: Things to Consider Before Signing a Health IT Agreement

This session will cover how the process of purchasing IT is very different from other items that are purchased during the normal course for a healthcare provider. Unless the functionality of the system is accurately described and the security and regulatory obligations and risks properly allocated, the healthcare provider may acquire a product that exposes them to substantial regulatory risk and have an agreement that provides little more than an obligation for the provider to pay the IT company's bill.

Michael Batt & David Bufford: Hall, Render, Killian, Heath & Lyman, P.C.
